

Dunlop 4WD Tyres

GRANDTREK PT3

Features

Silica based tread compound

Equal Rib Distribution

Pattern Design

Benefits

Provides better braking and grip on both wet and dry roads, also helps to reduce rolling resistance which can deliver better fuel efficiency

Improved straight line handling and stability for increased comfort on the highway

To reduce noise for a quieter ride

GRANDTREK AT3G

Features

Tough tectonic construction

Deep tread pattern

High Centre tread blocks

Benefits

Offers rugged strength for confident off-road driving and help resist cuts and punctures

Helps clear mud for versatile off-road traction

Provide superior traction in wet conditions

GRANDTREK PT2

Highway

The Grandtrek PT2 has been engineered in Japan to provide superior quietness, high speed stability and comfort for SUV and 4x4 vehicles. With silica tread compound the PT2 has improved handling and braking in the wet, along with improved mileage and fuel consumption. It has been manufactured for use on-road and therefore best suits the four wheel drive owner who enjoys a quiet smooth cruise

Features

- Silica based tread compound
- Four circumferential grooves
- Japanese engineering
- Low noise generation pattern

Benefits

Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.

Good water drainage for wet grip

High quality fitments available to suit most modern 4WD vehicles sold in Australia.

Promotes a quieter and smoother ride

GRANDTREK AT22

Highway

Fitted as original equipment on Toyota LandCruiser for superior 4WD performance. The Grandtrek AT22 features reinforced casing to reduce the risk of sidewall damage in tough off-road conditions. It is suitable for drivers who like to mix up their driving surfaces, on and off-road

Features

- Silica compound
- Robust Case Construction
- Original Equipment fitments

Benefits

Superior braking, cornering and handling in all conditions. Also reduces rolling resistance, which can enhance fuel economy.

Offers extra protection against many hazards commonly encountered in severe off-road conditions.

Endorsed as original equipment by leading 4WD manufacturers.

GRANDTREK AT20

Highway

Fitted as standard on Toyota Prado models for an exceptional ride. The Grandtrek AT20 features reinforced casing to reduce the risk of sidewall damage and is suitable for drivers who enjoy both on and off-road driving.

Features

Silica compound

Robust Case Construction

Benefits

Superior braking, cornering and handling in all conditions. Also reduces rolling resistance, which can enhance fuel economy.

Offers extra protection against many hazards commonly encountered in off-road conditions.

SP QUATTRO MAXX

Highway

The SP Quattro Maxx has been developed for exceptional performance on the most demanding SUV vehicles. It's designed with advanced features to cope with vehicles that are heavier, more powerful and have higher gravity centres than the standard SUV.

Wet
Performance

Features

Apex containing Kevlar fibre

Dual tread compound

Ultra-stiff breakers

Benefits

Enhanced steering response when accelerating and braking, together with increased stability when cornering

Ultimate dry grip and excellent wet handling and braking.

Improved road feedback and heavy handling performance.

Grandtrek TG35 M2

Highway

Developed with Toyota and endorsed as original equipment on their popular 4WD models. The TG35 M2 delivers superior on-road performance and solid off-road stability. It also features robust casing for enhanced strength in tough conditions.

Features

Silica compound

Robust Case Construction

Original Equipment fitments

Benefits

Superior braking, cornering and handling in all conditions. Also reduces rolling resistance, which can enhance fuel economy.

Offers extra protection against many hazards commonly encountered in severe off-road conditions.

Has been endorsed as original equipment by 4WD manufacturers

GRANDTREK ST20

Highway

This 4WD tyre helps to provide outstanding on-road performance and the capability to tackle off-road tracks. It also features a silica based compound for improved cornering, handling and braking.

Features

Silica tread compound

Original Equipment fitments

Spiral overlay construction

Benefits

Greatly increased wet braking and handling, while retaining outstanding levels of dry road performance

Endorsed by leading car manufacturers as original equipment.

Improves steering response and braking efficiency

SP5000

Highway

These 4x4 tyres produce superior all round performance

Features

Silica based tread compound

Optimised tread design with extended grooves

Robust casing

Benefits

Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.

Exceptionally low noise levels without compromising handling

Provides good stability and copes with Australia's arduous conditions

SP SPORT MAXX

Highway

Ideal for driving enthusiasts looking for an ultimate performance car tyre. The Sport Maxx utilises technology inspired by Dunlop's racing heritage and comes from the famous SP Sport Maxx family which is home to the V8 Supercar Control Tyre. The tyre delivers enhanced performance in wet and dry conditions and suits the majority of high performance vehicles including Lexus & Audi. "In my view, its quite simply the best road tyre in the world." John Bowe - Motorsport Legend and Dunlop Ambassador.

Features

Silica based tread compound

Multi-Radius Technology

Directional Tread Design

Benefits

Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.

Enhanced handling in wet and dry conditions.

Reduces the risk of losing control on wet roads.

SP SPORT 01

Highway

An impressive tyre, which meets the original equipment demands of many premium vehicle manufacturers including BMW, Mini, Audi and Jaguar. The Sport 01 promotes enhanced levels of braking and handling in wet and dry conditions and delivers low level noise and comfort.

Features

Silica based tread compound

Jointless Band construction

Asymmetric tread pattern

Original Equipment

Benefits

Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.

Jointless Band Construction (JLB) ensures the tyre retains its optimum shape when cornering for maximum steering response

Enhances cornering while retaining straight-line stability, with effective water dispersion in the wet.

Has been endorsed as original equipment by leading car manufacturers

GRANDTREK AT3

All Terrain

Developed for outstanding on and off-road performance, this 4x4 tyre gives you the best of both worlds. Enjoy high-speed stability and impressive off-road traction in tough conditions. The Grandtrek AT3 features lower noise generation for a quieter, more comfortable ride.

Features

Flat Tread Profile

2 in 1 shoulder block pattern

Japanese engineering

Benefits

More even distribution of contact pressure, resulting in even wear and improved tyre life

Delivers high traction in on and off-road conditions and reduces noise for a quieter ride.

High quality fitments available to suit most modern 4WD vehicles sold in Australia.

ROAD GRIPPER S

Off Road

The perfect 4WD tyres for drivers who spend as much time off the road as they do on it. The Road Gripper S is an exceptionally tough tyre, which delivers a superior performance in a variety of demanding conditions. It also meets the stringent tyre requirements of many leading 4WD manufacturers.

Features

Rugged tread design

Specially developed cavity shape

Robust Case Construction

Benefits

Good traction and bite in rough conditions.

Stronger cornering and tread wear

Offers extra protection against many hazards commonly encountered in severe off-road conditions.
