

# AT3LT

## ALL-TERRAIN

70% Road & Sand, 30% Dirt & Mud

The new generation all-terrain AT3LT™ delivers safety, reliability, durability, and peace of mind. With an 80,000km warranty\* it is real value for money and fit for purpose. The AT3LT™ has the latest Generation tyre Technology and can be fitted to most 4WD and SUV with a large size selection. America's most trusted 4x4 tyre, tested and proven in Australia.

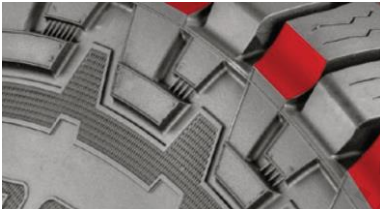

## FEATURES

## SCALLOPED SHOULDERS

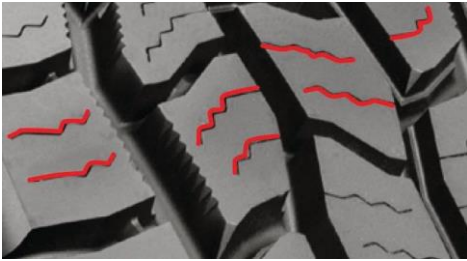

Deliver increased soft surface off-road traction usually reserved for a more aggressive tread design. This feature allows additional traction without compromising on road tyre performance and safety.

## SUPER TENSILE LIGHT TRUCK STEEL BELT

Provide stronger and more durable layers under the full tread area to protect against road hazards and stone damage. Durable Technology™ steel belts deliver improved tyre safety.

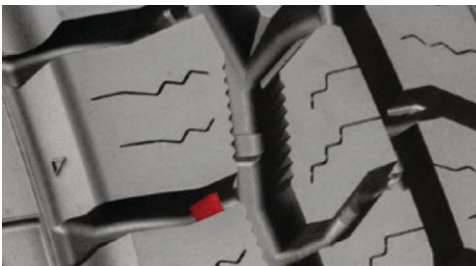

## MAXIMISED FULL-DEPTH MICRO GAUGESIPING

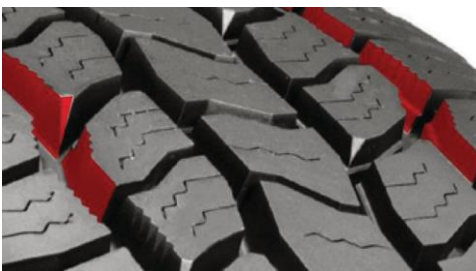

With more biting edges allows the tread blocks to interlock, giving you increased grip, handling and safety for the entire life of the tyre.

[MAXIMISED FULL-DEPTH MICRO GAUGE SIPING Video](#)

## GENTLE WHISPER GROOVE™ SHIELDS

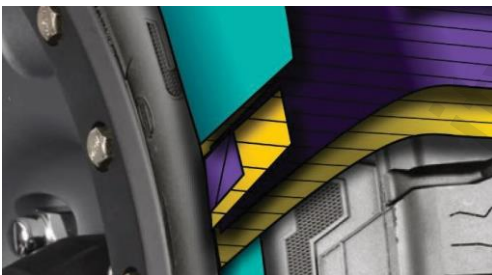

Contain tread pattern noise within the tread area to deliver even lower tread pattern noise (20% less) for increased in-cabin comfort. ("Listen to the music")

## DEEP TRENDS

Remain a key feature on the LT™ and XLT™ and with a combination of Durable Technology™ Coupled Silica Compound, reduces tread damage from cut and chip while delivering premium traction and tread life.

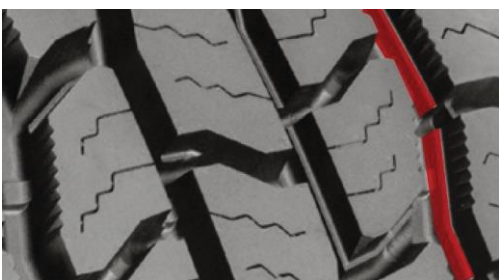

[DEEP TRENDS video](#)

## HIGH TENSILE LIGHT TRUCK BODY PLY

Cords protect your tyre from sidewall abrasion and increases resistance to sidewall damage. Durable Technology™ body ply cords deliver improved tyre safety.

## ROCK LEDGES

At the base of the tread blocks are designed to reduce stone retention and stone drilling, while also increasing tyre protection from hazards through less case exposure.

## NEXT GEN SILICA COMPOUND

With Durable Technology™ a cut and chip resistant compound for improved tread life and mileage. The silica content in the AT3LT™ and AT3XLT™, is optimised to deliver more grip, improved safety, extended tread life.
