

# EXTREME PERFORMANCE

**The 595 RS-RR** is an evolution of the race-winning 595 RS-R, delivering even faster lap times and better dry grip.

1. New silica-infused tread compounds provide outstanding grip and enhanced durability.
2. Flame-shaped grooves contribute to decreased aquaplaning and improved traction in rainy conditions.
3. Even stiffness in both center and shoulder areas minimize uneven wear for improved grip.

**The name 595 RS-R** has become a milestone, marking a legacy in Federal's ultra high performance tires.

1. Enhanced tire tread stiffness provides better grip, traction and cornering at high speed.
2. Wide V-shaped grooves maximize contact areas and water-channeling efficiency.
3. Steel tire cord and reinforced sidewalls deliver dashing cornering stability.

**The sleek 595 RS-PRO** is a EURO R117-certified street tire, engineered to satisfy your desire and style for aggressive performance.

1. Continuous central rib delivers straight line stability at high speed.
2. Dual circumferential grooves and V-shaped tread grooves channel water away effectively.
3. Advance carcass structure design ensures optimal roughness and contact patch.
4. Enhanced tire block rigidity and maximized patch areas grant outstanding grips and steering accuracy.

**The Evoluzion F60** is Federal's flagship tire for ultra high performance driving with superior responsiveness, expert handling, incredible braking, and outstanding grip!

1. New silica-infused tread compounds provide outstanding rigidity and enhanced durability.
2. Reinforced outer tread blocks provide enhanced traction during intensive driving, plus wear resistance.
3. Triple circumferential grooves and inner tread grooves maximize wet traction at high speed.

**The Evoluzion ST-1** is an ultra high performance summer tire that delivers comfort and performance in both wet and dry handling.

1. Advance wet grip compounds deliver optimized wet and dry traction.
2. Triple wide and one thin grooves reduce hydroplaning.
3. High-rigidity carcass structure brings enhanced cornering stability.
4. Large contact patch areas maximize traction and steering accuracy.

**The 595 RPM is Federal's ultra high performance** summer tire with the perfect combination of precise handling, refined quality, and comfortable rides.

**Ready to be worn by the ultimate sport sedan.**

595RPM's advanced compound and asymmetric tread design delivers the perfect blend of comfort and performance. 595RPM offers unparalleled grip and handling for the driving enthusiast. Get ready to be worn by the ultimate super cars.

#### **Features**

1. An asymmetric tire featuring soft sidewall and stiff outer areas for superior handling and comfort.
2. 3D tread design blends the tire's responsiveness, handling, and toughness for rigorous driving.
3. Circumferential grooves channel water away effectively, plus quiet and comfortable rides.
4. Rough outer areas provide extra traction during intensive driving, along with endurance.

**The 595 EVO** delivers exceptional grip, responsive steering, and precise cornering and control at high speed.

1. Optimized tread pitch and alignment reduces noise for comfort rides at high speed.
2. Reinforced central rib delivers straight line stability.
3. Large, stiff shoulder blocks increase lateral grip and cornering stability.
4. Four main grooves disperse water effectively to prevent aquaplaning.

**Federal's 595** is your perfect match for its balanced all-season driving and aggressive looks.

1. Uni-directional grooves enhance high-speed stability and traction.
2. Even stiffness in both center and shoulder areas minimize uneven wear for improved grip.
3. Steel tire cord and reinforced sidewalls ensure optimum performance in all temperatures.
4. Optimized tread pitch and alignment reduce noise for comfortable rides at high speed.
