

MUD-TERRAIN/T/A KM3

Off-Road

ALL OBSTACLES. ALL POSSIBILITIES.

Our next-generation off-road tyre for extreme conditions. Built through Experience... earned on the trail.

MADE TO MUD

The BFGoodrich Mud-Terrain T/A® KM3 has 5 percent better mud traction than its predecessor. “Mud-Phobic” bars on the tyre’s shoulders are designed to release compacted mud for enhanced traction in muddy or soft soil conditions. The tyre’s Terrain-Attack tread pattern includes massive tread blocks designed to deliver incredible grip from any angle of approach.

BUILT TO CLIMB

The advanced Krawl-TEK compound in the BFGoodrich Mud-Terrain T/A® KM3 delivers 8 percent better rock traction that enhances grip on rock and other slick surfaces. The tyre’s Linear Flex Zone allows it to envelop objects at reduced inflation for even more grip when climbing. The Traction-Armor Sidewall Sculpture and notched shoulder design also boost traction capabilities in soft soil and mud.

CREATED TO CONQUER

The BFGoodrich Mud-Terrain T/A® KM3 was designed to conquer the toughest off-road challenges with extreme sidewall protection, pinch shock resistance and chip-and-tear resistance on gravel. Its sidewalls are 27 percent tougher, thanks to CoreGard Max race-proven technology derived from the BFGoodrich Baja T/A® KR3 desert-racing tyre line. This technology helps prevent splitting or puncturing with increased thickness that protects the critical sidewall failure zone. The BFGoodrich Mud-Terrain T/A® KM3 also offers solid street performance and acceptable on-road noise levels for the rides to and from the trail.
