

PERFORMANCE TYRES

AZENIS FK510

Falken's latest generation ultra high performance tyre, the AZENIS FK510 is designed for drivers of premium vehicles looking for excellent grip and outstanding performance. 4D Nano Design enables Falken engineers to optimise new high-performance compounds at the molecular level, enhancing both wear and wet weather traction. Featuring hybrid under tread materials, the FK510 delivers confidence-inspiring handling and stability. The FK510 covers a wide range of today's luxury sport vehicles, including staggered applications, and is available in sizes ranging from 17 to 20-inch.

AZENIS RT615K+

Developed for the maximum performance-minded driver, the AZENIS RT615K+ is derived from the original competition-winning RT615K. The PLUS encompasses an all-new digitally-engineered, nanotech-formulated compound for superior grip and excellent handling. Its confidence inspiring straight line and cornering traits allow drivers to push the limits of their vehicle in safe, closed-course environments, while its street-capable durability and DOT approval allow for street-legal daily use as well. With 13 sizes from 14 to 18-inch rim diameters and a 200 A-A UTQG rating, the AZENIS RT615K+ is the ultimate choice for performance compacts, sports coupes, sports sedans and muscle cars.

ZIEX ZE914 ECORUN

The ZIEX ZE914 ECORUN is the next generation, high-performance tyre made for Australian roads. Engineered for performance and cost saving fuel efficiency, the low rolling resistance compound offers more mileage and better wet braking. The tyre features an asymmetric tread pattern with four straight and wide circumferential grooves for hydroplane resistance. The high-rigidity rib construction provides good wet and dry braking stability. Slots and sipes can be found throughout the tyre, optimised for even tread wear, comfort and traction.

ZIEX ZE912

The ZIEX ZE912 brings together in one tyre, technology and performance, that advances driver confidence whatever the weather condition. This tyre features large sipes encasing the tread, coupled with high volume circumferential grooves that deliver hydroplane resistance for improved wet weather performance, while its hybrid-asymmetric pattern produces better dry performance. The ZE912 is built to perform regardless of the condition of the road, each and every season.

SINCERA SN828

SINCERA SN828 implies safety, security and reliability. The new silica mixture optimises the performance on wet roads and increases wear resistance. This equates for a comfortable tyre with great life and low noise.
