

ZEON C7

Asia Registered Design No. 354072

TOURING

90% Road & Sand, 10% Dirt & Mud

The Zeon C7 is designed for the driver who appreciates quiet comfortable performance and the advantage of dependable safety, particularly in wet conditions.

Features

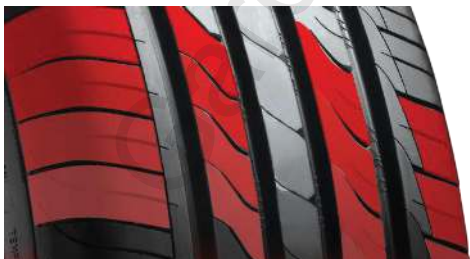

NOISE-SEALING RIB

The solid shoulder rib stops vibrations from expanding and keeps noise contained.

4 VARIABLE PITCH

The 4 variable pitch tread design keeps noise to a minimum for a quieter ride.

ELASTIC BEAD SIDEWALL CONSTRUCTION

The softer bead filler is a resilient material on top of the bead in the lower sidewall of the tyre to provide a "softer" ride by absorbing vibration and road disturbances.

SILICA COMPOUND

The silica compound is formulated with the optimum content of chemically-coupled silica, providing excellent extra wet traction and handling, while lowering rolling resistance.

CIRCUMFERENTIAL GROOVES

4-deep water channel efficiently evacuates water, giving you ultimate traction and exceptional cornering ability especially in wet conditions.
