

ZEON LTZ PRO

SPORTS ALL-TERRAIN

70% Road & Sand, 30% Dirt & Mud

Upgraded compound formulated with high content of silica for improved handling and braking distance, especially in the wet.

- Upgraded carcass construction for increased steering performance and damage resistance

FEATURES

OFFSET ALTERNATIVELY SCALLOPED SHOULDER LUGS

Deeper scallops on the optimum angle provide extra traction, giving you more grip in mud or loose surfaces.

ENHANCED BUTTRESS DESIGN

For the perfect balance between style, rugged off-road looks and performance, giving you enhanced traction and abrasion resistance.

5 RIB DESIGN

Balances on-road control/handling and off-road traction performance giving you an on-road feel with off-road capability.

CARCASS CONSTRUCTION

Features a hybrid construction between a sports truck tyre and an all-terrain tyre with stronger steel belts than found in original equipment/ passenger constructed tyres to give adventurers increased load carrying capacity and improved resistance to damage when off-road.

SAW TOOTH EDGES

Create biting edges for traction in harsh terrain and soft dirt applications, giving you excellent grip and self-cleaning.

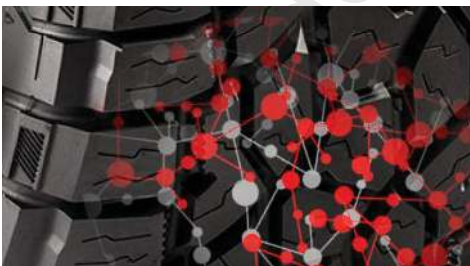

DUAL 'Z' SHAPED SIPES

Balance tread element stiffness, giving you excellent tread wear and handling for long, dependable traction in all-weather conditions.

CENTRE TIE BARS

Provides straight line directional stability, for an on-centre feel.

ADVANCED SILICA COMPOUND

Formulated with the optimum content of chemically coupled silica provides excellent extra wet traction and highway handling, while lowering rolling resistance. This gives you more grip and fuel efficiency.
