

ZEON RS3-G1

HIGH PERFORMANCE

100% on-road

The high performance RS3-G1 is designed specifically for performance vehicles to provide crisp handling at higher speeds.

FEATURES

3D MICRO GAUGE™ SIPING

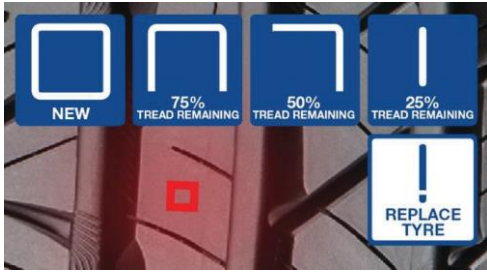

Specially designed 3D Micro Gauge™ sipes allow the tread blocks to interlock for maximum stability for increased traction, handling and safety, even at half worn.

ASYMMETRIC TREAD DESIGN

Allows for cross rotation which reduces heel-toe wear, giving you even wear, less noise and increased overall tread life.

WEAR SQUARE™ VISUAL INDICATORS

Indicators change as your tyres wear making it easy to determine the tread life remaining or mechanical problems causing irregular wear. This gives you convenience, confidence and safety you can see.

DUARBLE UNIFORM CONSTRUCTION

Is a combination of high density belt wire, high modulus polyester plies and high module bead filler, designed to give you a crisp and tight steering response.

ADVANCED SILICA COMPOUND

Formulated with the optimum content of chemically coupled silica provides excellent extra wet traction and highway handling, while lowering rolling resistance. This gives you more grip and fuel efficiency.
