

ALL TERRAIN 4WD & SUV TYRES

MT772 RAZR

The Maxxis flagship mud terrain tyre, the RAZR MT was engineered with the know-how gained from Maxxis' involvement in off-road racing. The new pattern features deeply sculpted centre blocks for excellent mud traction, while stone and mud ejectors improve self-cleaning performance and minimise rock retention. An innovative armour sidewall design maximises sidewall traction and puncture resistance, while deeply staggered shoulder blocks provide additional traction in difficult terrains. For ultimate peace of mind, the RAZR MT uses a dual-cord body-ply technology, ensuring additional casing strength for superior durability and toughness.

M8060 TREPADOR

Radial

Designed for the rigors of high-speed off-roading, the Trepador Radial features high-strength materials in a robust radial design for maximum puncture resistance and high-speed stability. Staggered shoulder blocks and multi-curve siping provide extra traction edges for additional traction bite on difficult terrain.

Bias

Designed to conquer off-road terrain with ease, the Trepador Bias features a conformable bias ply casing with ultra aggressive sidewall design for excellent off-road traction on sand and rocks. To improve on-road stability and performance, the tyre also features nylon belt reinforcement for extra high-speed stability while improving puncture resistance.

HT770 BRAVO

Known as the Maxxis flagship highway terrain tyre, the HT770 development team perfected the finer details to create a tyre worthy of being a flagship. Based on the Maxxis motor sports experience, the team created a new sidewall design that delivers a supple ride while maintaining excellent stability under heavy braking and crosswinds. The engineers also utilised a closed shoulder pattern design and multi-pitch tread blocks to create a comfortable driving experience.
