

# MA510

## PCR

The Maxxis MA510 is a quality passenger tyre with four circumferential grooves for superior water dispersion and wet traction. Its central tread pattern is designed with a stiff rib to enhance high speed stability, while the multi-pitch tread delivers a comfortable ride with low noise. Furthermore, the large shoulder block design increases the ground contact patch to improve handling performance and stability and the four wide groove tread design improves wet handling and reduces aquaplaning.

### FEATURES & BENEFITS

- 1 Circumferential grooves for superior water dispersion and wet traction.
- 2 Large shoulder block design increases the ground contact patch to improve handling performance and stability.
