## MA510

The Maxxis MA510 is a quality passenger tyre with four circumferential grooves for superior water dispersion and wet traction. Its central tread pattern is designed with a stiff rib to enhance high speed stability, while the multi-pitch tread delivers a comfortable ride with low noise. Furthermore, the large shoulder block design increases the ground contact patch to improve handling performance and stability and the four wide groove tread design improves wet handling and reduces aquaplaning.

## MA1 / WHITEWALL

The MA1 is the perfect touring tyre for almost any passenger car. With an attractive design and solid construction, the MA1 offers a variety of benefits. Its double steel-belted construction ensures long-lasting wear and uniformity. The tyre's jointless spiral-wrapped full nylon cap gives added strength and stability. Its solid centre rib ensures improved handling and high-quality performance, and the advanced tread design channels out water to resist hydroplaning in wet weather conditions. The MA1 WW version features a vintage raised white-wall for classic elegance.
