

VS01 VICTRA SPORT

UHP

An asymmetric UHP tyre designed for premium sport sedans, the VS01 features modern tread technologies to minimise perceived pattern noise. The tyre also features many structural reinforcements and high-strength materials to sharpen handling while maintaining a safe and easily managed drive.

FEATURES & BENEFITS

- 1 Continuous centre rib design improves braking and high-speed performance.
- 2 Reinforced shoulder and tread blocks reduce deformation when cornering for improved handling, traction and steering precision.
- 3 Multi-pitch tread block technology filters out unwanted pattern noise from inside the car.
- 4 High-strength steel belts and hard bead filler work together to improve steering response for a sportier feel.
